

BELZONA® 2000 SERIES ELASTOMERS FOR SWIMMING POOL EXPANSION JOINTS

CUSTOMER

Recreational facility located in British Columbia, Canada

APPLICATION DATE

March 1996

APPLICATION SITUATION

Expansion joints on indoor swimming pool

PROBLEM

Indoor swimming pools generally exhibit problems with their expansion joints, including shrinkage and leaks.

PRODUCTS

Belzona® 2211 (MP Hi-Build Elastomer)

Belzona® 2221 (MP Fluid Elastomer)

SUBSTRATE

Concrete / Ceramic Tile

APPLICATION METHOD

The application was carried out in accordance with a modified version of Belzona Know-How System Leaflet FPA-6.

BELZONA FACTS

There has been no maintenance on these expansion joints since installation in 1996. This application has saved both maintenance time and money. There is no more loss of expensive, chemically treated water.

PICTURES

1. General view of the facility.
2. Injecting the Belzona® 2221 into the expansion joints.
3. View of the completed pool.
