

BELZONA REPAIRS TO RUBBER LINED CONDENSER

CUSTOMER

Power station - Ireland

APPLICATION DATE

2003

APPLICATION SITUATION

Rubber lined water boxes of condensers.

PROBLEM

Spark testing of rubber lining highlighted several defects requiring repair.

PRODUCTS

Belzona® 2211 (MP Hi-Build Elastomer)

SUBSTRATE

Rubber & Steel

APPLICATION METHOD

Application was carried out in accordance with Belzona Know-How System Leaflet HEX-4. Spark testing identified defects which were then locally repaired.

BELZONA FACTS

Excellent adhesion and ambient curing properties of Belzona Elastomer allow effective long term repairs to be carried out within the confines of the water box.

PICTURES

1. Damaged areas of lining identified and marked ready for repair.
2. The repair area masked off to ensure application is kept within prepared area. Conditioner being applied.
3. One of the many local repairs completed.
