

BELZONA RESTORES AND PROTECTS RIVER WATER PUMP

CUSTOMER

Petrochemical Plant, Louisiana U.S.A.

APPLICATION DATE

October 2008

APPLICATION SITUATION

Cooling water pump drawing water from the Mississippi river.

PROBLEM

Pump was experiencing corrosion and cavitation erosion damage. Much of the casing was suffering from pitting caused by impingement.

PRODUCTS

Belzona® 1111 (Super Metal)

Belzona® 1321 (Ceramic S-Metal)

SUBSTRATE

Cast Iron casing, Carbon Steel impeller

APPLICATION METHOD

Application was carried out in accordance with Belzona Know-How System Leaflets CEP-1, -3 and -5.

BELZONA FACTS

The alternative to a Belzona repair is replacement which is considerably more costly, and takes several weeks for delivery. Similar repairs had already been carried out for this customer so belzona was obvious choice as not only is time and money saved but the life and performance of the pump is extended. This application can be performed at a cost of approximately \$15,000, and returned to service within one week.
