

BELZONA PROTECTS PARAPET WALLS FROM WATER PENETRATION

CUSTOMER

Toronto, ON, Canada

APPLICATION DATE

August 2013

APPLICATION SITUATION

Parapet walls of a condominium building.

PROBLEM

Water was penetrating the concrete.

PRODUCTS

Belzona 3911 (PSC Surface Conditioner)

Belzona 5131 (EG-Cladding)

SUBSTRATE

Concrete

APPLICATION METHOD

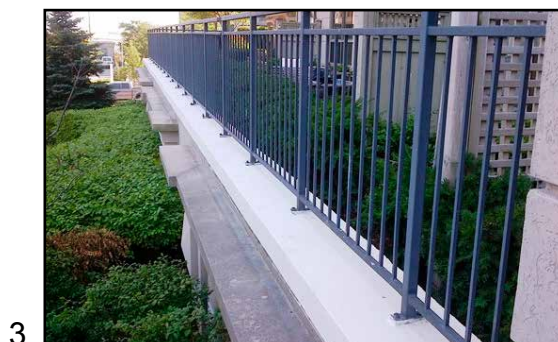

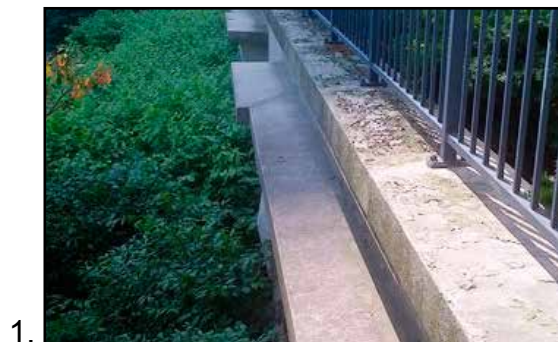

The application was carried out in accordance with Belzona Know-How System Leaflet RPA-10 for sealing leaking areas in parapet walls and copings. A wire brush was used to prepare the surface and brushed off to remove all the dust. Belzona 3911 was applied with a brush to the entire surface. Belzona 5131 was applied with a lambs wool roller in accordance with Belzona Instructions For Use.

BELZONA FACTS

Belzona 5131 is a coating for long term waterproofing and weatherproofing of exterior and interior walls and structures which provides long term protection. Belzona 5131 also has built-in energy conservation properties providing low thermal conductivity that together with exceptionally low heat capacity, will make cold surfaces feel warm thus minimizing condensation and make warm surfaces feel cooler.
