

## BELZONA PROVIDES SOLUTION TO LEAKING HOSPITAL ROOF

### CUSTOMER

Hospital, Leeds, UK

### APPLICATION DATE

March 2011

### APPLICATION SITUATION

Felt roof over physiotherapy facility within the hospital.

### PROBLEM

The felt roofing system had become porous over time and was allowing water into the building below. This was causing major disruption to the operation of the hospital as well as posing a health & safety risk.

### PRODUCTS

Belzona® 3131 (WG Membrane)

### SUBSTRATE

Mineral Felt

### APPLICATION METHOD

Application was carried out in accordance with Belzona Know-How System Leaflet RPA-8. The entire roof was thoroughly cleaned to remove moss and lichens before applying a fully reinforced Belzona® 3131 System.

### BELZONA FACTS

The Belzona solution was selected due to its ability to be applied in low temperatures. The client was looking for a cost effective solution which would cause no disruption to the operation of the hospital and without the need for hot works to be carried out.
