

BELZONA HELPS KEEP THE PORT OPEN

CUSTOMER

Port authority, London, UK

APPLICATION DATE

August 2013

APPLICATION SITUATION

Hull of a survey vessel operating on the river Thames.

PROBLEM

After 10 years of service on the river the hull of the vessel was suffering from cavitation around the propellor area. Previous repair method had been welding.

PRODUCTS

Belzona® 1111 (Super Metal)

Belzona® 1341 (Supermetalgilde)

SUBSTRATE

Aluminium

APPLICATION METHOD

The application was carried out in accordance with Belzona Know-How System Leaflet SOS-1 & SOS-2, Belzona® 1111 was used to build up the worst affected areas and then Belzona® 1341 was then brush applied to provide overall protection.

BELZONA FACTS

Previous methods would have been to weld plates onto the hull and use an inferior coating, meaning hot works and regular inspections of the hull. The port now have the confidence to inspect on a longer basis meaning the vessel can survey the river for longer periods, saving time and money in a dry dock.
