

CLARIFIER HEADWORKS GET QUICK FIX WITH BELZONA

CUSTOMER

Waste Treatment Plant, Northern Texas, USA

APPLICATION DATE

2014

APPLICATION SITUATION

Chemical attack to headworks of clarifier.

PROBLEM

The headworks of a clarifier were covered with a plate to reduce H₂S odor. This caused chemical attack to the concrete.

PRODUCTS

Belzona 4111 (Magma-Quartz)

Belzona 5831 (ST-Barrier)

SUBSTRATE

Concrete

APPLICATION METHOD

The application was carried out in accordance with Belzona Know-How System Leaflet TCC. The concrete was blasted and bugholes were filled with Belzona 4111. Two coats of Belzona 5831 were then applied.

BELZONA FACTS

The headworks could not be coated with a competitor since it required a 3 day cure. This job was completed in just 12 hours and returned to service to let Belzona 5831 cure under water.
