

## BELZONA CREATES NON-SLIP SAFETY SURFACE IN FISH MARKET

### CUSTOMER

Fish market, Croatia

### APPLICATION DATE

June 2016

### APPLICATION SITUATION

Slippery wet floors in the fish market operating in a touristic city every day from 6am to 2pm.

### PROBLEM

Existing quarry tiles are wet and slippery. During summer season there is plenty of people and there was a risk of slip and fall injuries. Customer was looking for a slip-resistant solution that could be applied without the need to close the market.

### PRODUCTS

Belzona 5231 (SG Laminate)

Belzona 9211 (Supergrip Aggregate)

### SUBSTRATE

Quarry tiles

### APPLICATION METHOD

The application was carried out in accordance with Belzona Know-How System Leaflet FPA-8. Additional Belzona 9211 aggregate was incorporated into the Belzona 5231 for better anti-slip protection.

### BELZONA FACTS

The application on 70 square meters was carried out section by section, over 6 afternoons. This enabled the fish market to operate normally every day. Viable alternative were sealable strips, but they wear out very quickly in these conditions. Other alternatives included closing the market, which was unacceptable for the customer.

### PICTURES

1. Condition of the fish market floor, placing masking tape
2. Surface preparation.
3. Application of Belzona 5231 with additional aggregate incorporated.
4. Application completed - situation after washing the floor
