

BELZONA PROTECTS NEW GLYCOL TANK

CUSTOMER

Steel fabrication company, Scotland, UK

APPLICATION DATE

June 2016

APPLICATION SITUATION

A newly fabricated tank for an industrial refrigeration system was in need of corrosion protection.

PROBLEM

The tank is to contain Propylene Glycol so it was expected that in service corrosion would be experienced. A short turn around time was required for this tank to be returned to service within the customers expectations. Access was also restricted within the tank due to the internal furniture.

PRODUCTS

Belzona 5811 (Immersion Grade)

SUBSTRATE

Mild steel

APPLICATION METHOD

Application was carried out in accordance with Belzona system Leaflet TCC-5.

BELZONA FACTS

The choice was between a corrosion resistant coating & fabricating a new tank out of stainless steel. Cost & lead time favored the coating option.
