

BELZONA REBUILDS AND PROTECTS FERRY RUDDER HORNS

CUSTOMER
BC, Canada

APPLICATION DATE
December 2004

APPLICATION SITUATION
Rudder Horns

PROBLEM
The rudder horns are subject to both erosion and cavitation damage.

PRODUCTS
Belzona 1311 (Ceramic R Metal) Belzona 1341 (Supermetalglide)

SUBSTRATE
Cast steel

APPLICATION METHOD
Application carried out in accordance with Belzona Know-How System Leaflet SOS-1/2

BELZONA FACTS
Rebuilding eroded areas with Belzona rebuilding compounds is both quick and effective saving many hours of dry docking time. The conventional way would be welding.
