

BELZONA SEALS SKYLIGHTS OVER PRODUCTION HALL

CUSTOMER

Machinery plant, Slovakia

APPLICATION DATE

2006

APPLICATION SITUATION

Skylights in the roof of production hall

PROBLEM

Corrosion of steel frame and rubber seal degradation on the skylights, caused by the effects of weather, was allowing rainwater to leak directly into the production hall creating safety issues and damage of interior machinery.

PRODUCTS

Belzona® 3111 (Flexible Membrane)

SUBSTRATE

Glass & Steel

APPLICATION METHOD

Application was carried out in accordance with Belzona Know-How System Leaflet RPA-3. A fully reinforced Belzona® 3111 system was applied to bridge over the glazing bars and seal onto the glass.

BELZONA FACTS

To replace the rubber seals would take a long time and expose the interior to the full effects of the weather as well as interfering with production below. Repairs using the Belzona system was completed in 5 days without any disruption to the production process.
