

## BELZONA SHM-12 POSITIVE GRIP SYSTEMS USED TO RE-LAG DRIVE PULLEY

### CUSTOMER

BC, Canada

### APPLICATION DATE

January 1997

### APPLICATION SITUATION

Rubber lagging on drive pulley

### PROBLEM

The original rubber lagging was no longer effective and customer opted for Belzona because it could be done in the maintenance shop over the weekend.

### PRODUCTS

Belzona 1321 (Ceramic S-Metal)

Belzona 9211 (Supergrip Aggregate)

### SUBSTRATE

Steel

### APPLICATION METHOD

Application carried out in accordance with Belzona Know-How System Leaflet SHM-12

### BELZONA FACTS

The Belzona product is applied directly to the steel roll. It also provides a far higher degree of positive traction increasing belt life by reducing slippage.

### PICTURES

1. The original lagging has been removed and the steel surface ground to provide a rough profile onto which the Belzona product is applied
2. Completed application. In this instance a chevron type pattern was employed to ensure that rain water (Outside application) would be swept to the outer circumferences of the roll.
