

## BELZONA PROTECTS 50,000 SQ.FT FLOOR AREAS OF A TECHNOLOGY CENTER & LABORATORY

### CUSTOMER

Copper Mine, Arizona

### APPLICATION DATE

2013

### APPLICATION SITUATION

Belzona floor coatings were specified to protect floor areas in a newly constructed Technology Center & Laboratory.

### PROBLEM

Potential spillage of various acids.

### PRODUCTS

Belzona 5811 (Immersion Grade)  
Belzona 4311 (Magma CRI)

### SUBSTRATE

Concrete

### APPLICATION METHOD

Application was carried out in accordance with Belzona Know-How System Leaflet FPA-3, following the 28 day curing process of the newly poured concrete. Belzona 5811 was applied to general floor areas and Belzona 4311 - to laboratory floors. The application of the coating systems was successfully completed using a combination of squeegee and paint rollers.

### BELZONA FACTS

The Belzona systems were specified by the largest mining company in the world for this extremely important facility, which is their primary worldwide Technology Center & Laboratory. The numerous successful projects completed with Belzona in the previous decade was instrumental in the use of Belzona on this large 50,000 sq. ft. project.
