

## BELZONA SEALS LEAK IN UNDERWATER OBSERVATION WINDOW

### CUSTOMER

Vancouver, BC

### APPLICATION DATE

March 2015

### APPLICATION SITUATION

A leak on the underwater window.

### PROBLEM

The underwater observation window had developed a leak.

### PRODUCTS

Belzona 2211 (MP Hi-Build Elastomer)

### SUBSTRATE

Stainless Steel/ Butyl Rubber

### APPLICATION METHOD

The application was carried out in accordance with a modified Belzona Know-How System Leaflet FPA-6. The stainless steel surround was prepared using a grinder to achieve a clean rough profile on the metal surface. After masking off the perimeter, a 1/8 thick rubber tape was used to create a suitable clearance on the inside of the window-sufficient to clear the screw heads.

### BELZONA FACTS

Belzona Elastomer had been used successfully in similar situation.

### PICTURES

1. View of observation window
2. Metal surface prepared
3. Perimeter of the window masked off
4. Completed application with all tapes removed
