ID: 1049

Industry: *Buildings & Structures*  
Application: *FPA-Floor Problem Areas*  
Substrate: *Brick & Mortar*  
Products: *Belzona® 4181 (AHR Magma Quartz)* <div>*Belzona® 5891 (HT Immersion Grade)* </div>

Customer Location: *Dairy, Oklahoma*  
Application Date: *March, 2008*

## Problem

*Existing floor covering badly deteriorated due to regular spills of hot CIP solutions. The dairy is only down from production on Saturday/Sunday.*

## Photograph Descriptions

\* Old floor , \* Surface preparation , \* Coating the floor , \* The rebuilt and finished floor ,

## Application Situation

Dairy floor subject to regular cleaning and sterilization. area contains dip tanks containing hot cleaning CIP (Cleaning In Place) chemicals.

## Application Method

Application was carried out in accordance with Belzona Know-How System Leaflets FPA-1 & -8. The existing coating was removed with diamond grinders and dust collectors. The floor was repaired with Belzona® 4181, then Belzona® 5891 was applied over the top with a non-slip aggregate on the surface.

## Belzona Facts

The plant chose Belzona because of its previous successes and the ability to complete within the short break in production.
