# **BELZONA® 1391 PROTECTS CATALYTIC CRACKER**

Industry:	Oil & Gas
Application:	TCC-Tanks and Chemical Containment
	Areas
Substrate:	Carbon steel
Products:	* Belzona® 1311 (Ceramic R-Metal) ,
	* Belzona® 1391 ,

Customer Location: *Oil Refinery, U.K.* Application Date: 1996

#### Problem

Extensive erosion-corrosion on the shell wall caused by the hot hydrocarbon mixture.

## **Photograph Descriptions**

- \* General view of the application site ,
- \* Application of Belzona® 1391 underway ,
- \* View through the manway showing confined working conditions ,
- \* Application completed with hatch covers also coated with Belzona® 1391,

## **Application Situation**

The light ends tower within the Catalytic Cracker.

#### **Application Method**

Application was carried out in accordance with Belzona System Leaflet TCC-5.

## **Belzona Facts**

Metal loss, if allowed to continue, would have led to the structural integrity of the wall being compromised. Repair or replacement would have led to a major shutdown of the refinery with its major associated loss of revenues. The Belzona products lent themselves to application within the confines of the tower and allowed its return to service with minimal downtime.
