BELZONA EXTENDS LIFE OF CHILLER

ID: 1103

Industry: Heating, Ventilation & Air Conditioning Customer Location: International Airport, Stockholm

Application: HEX-Heat Exchangers Application Date: 2005, 2008

Substrate:

Products: * Belzona® 1311 (Ceramic R Metal),

* Belzona® 1321 (Ceramic S Metal),

Problem

Corrosion on tubesheets (4) from one of the chillers was noticed in 2005. Cooling water comes from a local lake which together with galvanic effects was the cause of the corrosion.

Photograph Descriptions

- * General view ,
- * Close up of erosion on tubesheet ,
- * Steam cleaning,
- * Completed application,

Application Situation

Three chiller units for air conditioning of terminal buildings.

Application Method

Application was carried out in accordance with Belzona System Leaflet HEX-1. Surface preparation included steam cleaning to remove salt contamination.

BELZONA

Belzona Facts In 2008, the chillers were inspected and the two untreated ones were found to have severe erosion, whereas the Belzona protected one was still in excellent condition.
