Products: <div>Belzona® 1121 (Super XL-Metal)</div><div>Belzona® 1161 (Super UW-Metal)</div>

## Problem

The carbon steel barrel began to leak due to erosion corrosion.

## Photograph Descriptions

\* Abrasive grit blasting the surface showed hole in substrate , \* Contrast between optimal grit blast and grinding , \* Completed application , \* Review of the procedure by the application crew ,

## Application Situation

Barrel of chiller circulating salt water

## Application Method

The application was performed in accordance with Belzona Know-How System Leaflet VPF-11A.

## Belzona Facts

The customer began to cycle salt water through the chiller barrel in an effort to lower the operating temperature of the unit and in turn, accelerate the production rate of the food process. Result was accelerated corrosion damage. A replacement for this barrel would not be available for six months, and a rupture would cause millions in lost production. Belzona saved the day, and was able
