

BELZONA REPAIRS LARGE SPOOL PIECES

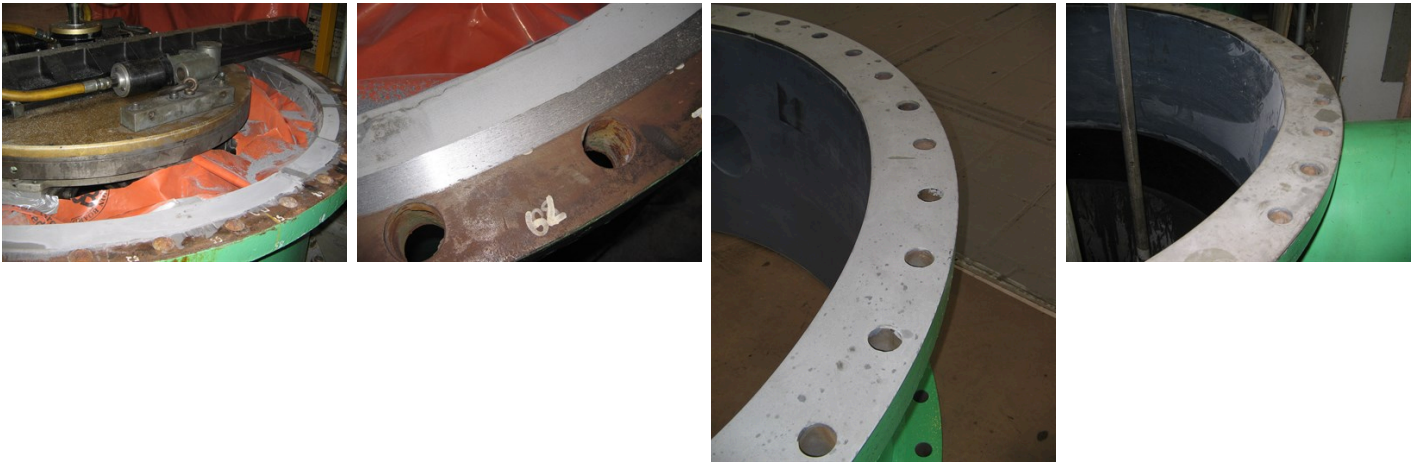

ID: 1392

Industry: Power
Application: VPF-Valves, Pipes and Fittings
Substrate: Cast steel
Products: * Belzona® 1111 (Supermetal) ,

Customer Location: Nuclear Power Plant, UK
Application Date: August 2006

Problem

An alternative repair material was used previously but had failed. The product was used to resurface the face of the spool where there was distortion.

Photograph Descriptions

- * 1 & 2 Pre-machined flange surface ,
- * 3 & 4 Finished machined flange faces ,

Application Situation

Damaged spool faces. Corrosion and distortion from weld stresses.

Application Method

Application was carried out in accordance with a modified version of Belzona Know-How System Leaflet VPF-13.

Belzona Facts

Client had previously used an alternative product but had found that it could not withstand the weight of the valve spools on it. Using Belzona® 1111 the machined flange face can withstand immense compressive loads so providing for long term durable sealing.
