BELZONA PROTECTS CONTACTER TANK

ID: 1396

Industry: Water / Wastewater Customer Location: Water treatment plant, New Jersey

Application: TCC-Tanks and Chemical Containment Application Date: 2008

Areas

Substrate: Concrete

Products: * Belzona® 5111 (Ceramic Cladding),

* Belzona $^{\circ}$ 5911 (Ceramic Conditioner) ,

* Belzona® 4111 (Magma Quartz),

Problem

Sodium Hypochlorite vapors had destroyed the concrete walls above the water line. The previous coating, an inexpensive commodity product, failed in this aggressive chemical environment.

Photograph Descriptions

- * The deteriorated tops of the concrete wall,
- * Tops removed and cleaned up,
- * Belzona® 5111 tinted sky blue.,
- * Spillway rebuilt with Belzona® 4111,

Application Situation

Final Chlorine contact tank at municipal waste water plant.

Application Method

Application carried out in accordance with Belzona Know-How System Leaflets TCC-9 & WPA-2. The deteriorated tops of the concrete wall were removed and replaced. The walls were then prepared by grit-blasting before applying the Belzona® 5111 system (tinted blue). Belzona® 4111 was used to repair the spillway.

Belzona Facts

Belzona products were chosen for their proven chemical resistance to the aggressive chemicals used in modern-day waste water
