

NOZZLE IN ACID TANK PROTECTED WITH BELZONA INSERT

ID: 1572

Industry: Chemical & Petrochemical
Application: TCC-Tanks and Chemical Containment Areas
Substrate: Ebonite
Products: * Belzona® 4301 (Magma CR-1 Hi-Build),
* Belzona® 4311 (Magma CR-1),

Customer Location: Chemical manufacturer, Cataluña, Spain
Application Date: October 2010

Problem

The interior of an ebonite lined nozzle handling 26% Hydrochloric acid had suffered damage.

Photograph Descriptions

- * Outer view of the tank and nozzle ,
- * Belzona® 4301 Nozzle Insert being installed ,
- * Surrounding Ebonite rebuilt with Belzona® 4301 to seal the insert ,
- * Insert sealed at the flange ,

Application Situation

Nozzle into Hydrochloric acid storage tank at Caustic soda producer

Application Method

The application was carried out according to the Belzona Know-How System Leaflets TCC-16a and TCC-16b. Nozzle was made from Belzona® 4301 and bonded into place with Belzona® 4311.

Belzona Facts

Belzona solution allowed a fast back to service time for the tank with an easy in-situ repair. This proves to be far more cost effective than relining with an Ebonite coating.
