

BELZONA RESTORES PERFORMANCE TO DIESEL POWERED GENERATOR

ID: 200

Industry: *General Industry*
Application: *ENC-Engines and Casings*
Substrate: *Cast Iron*
Products: ** Belzona® 1391 ,*

Customer Location: *Utility in West Texas U.S.A.*
Application Date: *December 1999*

Problem

Pitting and corrosion on water jacket side of engine block. This made it impossible for O-ring fits to seal cooling water, allowing water to leak from under heads and into piston sleeves.

Photograph Descriptions

- * Close-up of 1941 diesel powered generator ,
- * Broad view of 1941 generator ,
- * Surface preparation of water ports ,
- * Application of Belzona®1391 to the top of the engine block ,

Application Situation

Diesel engine used to run generator.

Application Method

Application was carried out in accordance with a modified version of Belzona Know-How System Leaflet ENC-6.

Belzona Facts

After application was completed, surface was sanded and filed using in-house mechanics at a cost of \$5,000 (material and labor). This was much more cost effective than \$45,000 for welding and machining the engine block.
