

BELZONA PROVIDES PROTECTION FOR VACUUM PUMP CONE

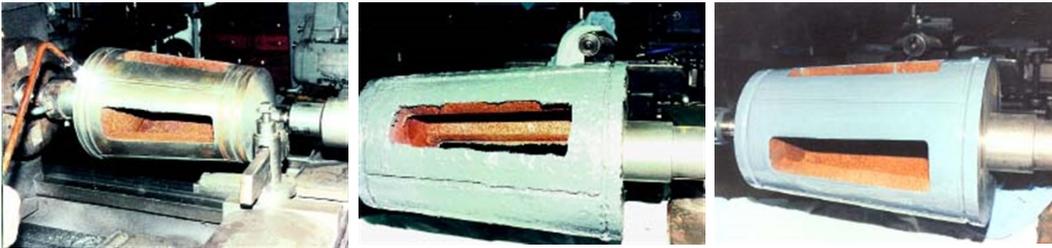

ID: 227

Industry: Sugar
Application: CEP-Centrifugal Pumps
Substrate: Steel
Products: * Belzona® 1111 (Super Metal) ,
* Belzona® 1341 (Supermetalglide) ,

Customer Location: Sugar beet mill in Minnesota, U.S.A.
Application Date: 1993

Problem

Erosion/corrosion damage can occur over the surface of a vacuum pump cone due to particle entrainment and chemical attack.

Photograph Descriptions

- * Removal of any of the cone's surface contaminants is treated with a torch ,
- * Use of Belzona® 1111 to rebuild irregularities ,
- * Belzona® 1341 provides final erosion/corrosion protection ,

Application Situation

Vacuum pump cone.

Application Method

The application was carried out in accordance with a modified version of Belzona Know-How System Leaflet CEP-8.

Belzona Facts

The machinability of the Belzona 1000 Series Metals like the Belzona® 1111 in this case ensures that the right taper is achieved on the cone, and that all imperfections are filled. The use of a coating system further reinforces the overall protection.
