

# BELZONA OFFERS COLD REPAIR SOLUTION TO PIPEWORKS

ID: 2316

**Industry:** Oil & Gas

**Customer Location:** Refinery in France

**Application:** VPF-Valves, Pipes and Fittings

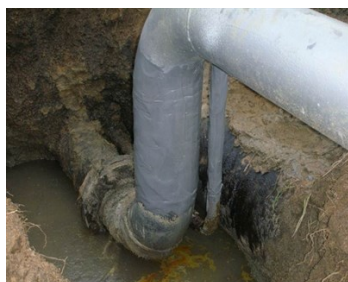

**Application Date:** 2006

**Substrate:** Carbon steel

**Products:** \* Belzona® 1121 (Super XL Metal) ,  
\* Belzona® 5811 (Immersion Grade) ,

## Problem

Previous coating did not last and external corrosion of the pipework was extensive.

## Photograph Descriptions

- \* Failure of the previous coating ,
- \* Repair using Belzona® 1121 and reinforcement tape ,
- \* Extra corrosion protection being provided with Belzona® 5811 coating ,
- \* Repair completed ,

## Application Situation

The pipework close to the ground is constantly exposed to water and mud.

## Application Method

Following a surface preparation done by hydroblasting, the repair was carried out in accordance with Belzona Know How System Leaflet VPF-11a.

## Belzona Facts

Given the environment, a hot repair was not an option. Belzona's cold application techniques allowed the customer to repair and protect these pipes using a sandwich material made of resins and reinforcement tape. The repair was inspected in 2011 and remained in perfect condition. Since 2006, many more pipes have been repaired using this technique.
