

BELZONA® 1311 (CERAMIC R-METAL) SAVES A PLANT SIX WEEKS OF DOWNTIME

ID: 254

Industry: *Oil & Gas*
Application: *HEX-Heat Exchangers*
Substrate: *Steel alloy*
Products: ** Belzona® 1311 (Ceramic R-Metal) ,*

Customer Location: *Oil and gas plant - Alberta, Canada*
Application Date: *July 1998*

Problem

Small pin holes had developed in the heat exchanger plates

Photograph Descriptions

- * 1/16 inch pin holes masked off in prepared surface area ,
- * Belzona® 1311 (Ceramic R-Metal) applied and force cured with heat lamps ,
- * All four flame heat exchanger plates are ready for installation ,

Application Situation

Flame plate heat exchanger

Application Method

The application was carried out in accordance with Belzona Know-How System Leaflets HEX-5 and a modified version of TCC-5.

Belzona Facts

Four heat exchanger plates were rebuilt while the plant had a scheduled shut down. Replacement plates were the only alternative and would have taken six weeks before being delivered. Belzona® 1311 repaired the damage without welding and saved the plant six weeks downtime.
