BELZONA REPAIRS A CLASSIFIER AND SAVES THE CUSTOMER THOUSANDS IN REPLACEMENT COSTS

ID: 258

Industry: Water / Wastewater Customer Location: Water Treatment Plant - New Mexico

U.S.A.

Application: SHM-Solids Handling Machinery Application Date: July 2001

Substrate: Steel

Products: * Belzona® 1111 (Super Metal),

* Belzona® 2111 (D&A Hi-Build Elastomer),

Problem

The rubber donut type ring was designed too small allowing the adjacent steel to wear through.

Photograph Descriptions

- * An overview of the equipment ,
- * A close-up of the damage ,
- * The surface is being prepared,
- * The completed repair,

Application Situation

Solids classifier in the grit removal system.

Application Method

The application was carried out in accordance with Belzona Know-How System Leaflet SHM-9.

Belzona Facts

Belzona® 1111 (Super Metal) was used to bond several steel patches where the steel had worn through. Then Belzona® 2111 (D&A Hi-Build Elastomer) was used to re-create a durable donut replacement. Alternatives included replacement of equipment at \$14,000 each. Welding would have ruined the existing rubber donuts. The Belzona Solution was only \$600 for each classifier.
