BELZONA PROTECTS HOT PIPEWORK

ID: 2710

Industry: Chemical & Petrochemical Customer Location: Refinery, Germany
Application: TCC-Tanks and Chemical Containment Application Date: September 2010

Areas

Substrate: Mild Steel

Products: * Belzona® 5851 (HA-Barrier),

Problem

Original paint system was failing allowing pipework to corrode. New protection required to be applied whilst system remained operational.

Photograph Descriptions

- * Surface preparation underway,
- * Temperature reading of the hot pipe,
- * Application of coating,
- * Finished application,

Application Situation

Hot pipework (aprox. 110°C) in the refinery

Application Method

Application was carried out in accordance with Belzona System Leaflet TCC-5. As the pipe was in hot service only minimal surface preparation could be carried out to remove the exsisting coating. Once the pipe was returned to a sound substrate, the product was applied by brush to the hot pipework.

Belzona Facts

Although this was a successful trial the major work which was intended has yet to proceed.
