

BELZONA PRESCRIBED AT UNIVERSITY HOSPITAL

ID: 293

Industry: General Industry
Application: FPA-Floor Problem Areas
Substrate: Concrete
Products: * Belzona® 4111 (Magma Quartz) ,

Customer Location: University Medical Center
Application Date: 1986

Problem

The entrance to the medical center was irregular from the concrete slabs settling "this is a high traffic area, with new born infant incubators, patients in wheel chairs, and sensitive instrumentation all having trouble crossing the area.

Photograph Descriptions

- * 1-inch transition between slabs ,
- * Troweling in the Belzona® 4111 ,
- * Finished application in front of the hospital ,

Application Situation

Concrete slabs in front of medical center entrance.

Application Method

The application was carried out in accordance with Belzona Know-How System Leaflet FPA-1. Belzona® 4111 (Magma Quartz) was used to level the transition area between slabs, giving a smooth transition.

Belzona Facts

Because Belzona can be feather edged and has superior adhesion to the existing concrete, heavy traffic will not deteriorate the cold joint between slabs.
