Problem

The expansion joint on the floor leading into the freezer was completely destroyed by continuous fork lift traffic as well as the freeze/thaw cycles at the frost line.

Photograph Descriptions

- * Significant damage to expansion joint at freezer entrance ,
- * Deteriorated concrete removed exposing rebar ,
- * Screeding in Belzona® 4131 (Magma Screed) ,
- * Belzona® 2211 used to seal the joint ,

Application Situation

Expansion joint on the floor leading into the freezer.

Application Method

The application was carried out in accordance with Belzona Know-How System Leaflets FPA-5 and FPA-6.

Belzona Facts

Freeze/thaw effects are very damaging to concrete and the repair material used must be able to cure in cold temperatures and still maintain significant adhesion to the existing substrate.
