

BELZONA KEEPS SAWMILLS RUNNING EFFICIENTLY WITH ITS POSITIVE GRIP SYSTEM

ID: 305

Industry: *Pulp & Paper*

Application: *SHM-Solids Handling Machinery*

Customer Location: *Sawmill in British Columbia, Canada*

Application Date: *1996 - Present*

Substrate: *Steel*

Products: ** Belzona® 1321 (Ceramic S-Metal) ,*

** Belzona® 9211 (Supergrip Aggregate) ,*

Problem

The sawmill planer bridge rolls are usually welded or cross-hatched to effectively grip and transfer the lumber. These rolls wear relatively quickly from abrasion, which reduces the throughput and/or quality of the cut lumber.

Photograph Descriptions

- * Paper bridge rolls worn smooth ,
- * Surface preparation ,
- * Application of Belzona® 1321 and Belzona® 9211 ,

Application Situation

First cut bridge planer rolls at a sawmill in British Columbia.

Application Method

The application was carried out in accordance with Belzona Know-How System Leaflet SHM-12.

Belzona Facts

These rolls are typically in service for 3-5 years depending on the particular saw mill activity and type of lumber produced. Initially the aggregate will come off, but after a few minutes of operation, no more material will be removed from the rolls.
