Photograph Descriptions

- * Worn fan casing damaged from abrasive particles is rebuilt and protected with Belzona® 1812. ,
- * Fan impeller is coated with Belzona® 2121. ,
- * The crew is happy with their work. ,

Application Situation

Fly ash fan moves fly ash from a lower hopper into one at an upper level of the plant.

Application Method

The application was carried out in accordance with Belzona Know-How System Leaflets FBC-2 and FBC-5.

Belzona Facts

The fan impeller had a life expectancy of 3 months and costs \$1,300. The housing had a life expectancy of one year and costs \$3,000. After one year of service following the Belzona application, the fan was opened up and inspected. The impeller was 90% perfect and the housing was 100% perfect. The impeller was re-coated in June 2003, the housing remains perfect. This application has saved the customer over \$15,000 in less than two years.
