

BELZONA EXPANSION JOINTS REFURBISHED AFTER 5 YEARS SERVICE

ID: 4251

Industry: Buildings & Structures

Customer Location: Municipal swimming pool, Victoria,
British Columbia

Application: FPA-Floor Problem Areas

Application Date: January 2012

Substrate: Ceramic tile / Concrete

Products: * Belzona® 2211 (MP Hi-Build Elastomer) ,
* Belzona® 2221 (MP Fluid Elastomer) ,

Problem

Over a period of time the exposed surface of the Belzona Elastomer oxidizes allowing it to slowly erode with the water movement.

Photograph Descriptions

- * Some of the Belzona expansion joints after 5 years of service had eroded to below the level of the pool tiles and needed to be “topped up” ,
- * The old joints were cleaned with a wire wheel to remove all oxidation before being Conditioned ,
- * Joints refurbished with Belzona® 2221 ,

Application Situation

The original Belzona expansion joints had been in service for 5 years.

Application Method

Application was carried out in accordance with Belzona Know-How System Leaflet FPA-6.

Belzona Facts

Belzona Elastomers have a long successful history providing long term repair and maintenance solutions in municipal type swimming pools. The Belzona system is easily maintained to provide long term water containment.
