

BELZONA PROTECTS OFFSHORE CONDUCTOR CABLE

ID: 4382

Industry: Oil & Gas

Customer Location: Oil Producer, North Sea, Norwegian Sector

Application: SHM-Solids Handling Machinery

Application Date: September 2012

Substrate: Stainless Steel

Products: * Belzona® 2141 (ACR Fluid Elastomer),

Problem

It was important that clamps, when being slid into position did not damage the conductor cable. Belzona Elastomer lining used to prevent damage.

Photograph Descriptions

- * First stack of clamps ready for application ,
- * Belzona® 2141 applied ,
- * Splash zone clamps assembled ,
- * Underwater clamp assembly in place ,

Application Situation

Clamps for securing conductor cable to platform leg.

Application Method

Application was carried out using a modified version of Belzona System Leaflet SHM-9. Internal areas of clamps were lined with 1mm of Belzona® 2141. An approved paint was applied to exteriors.

Belzona Facts

The Belzona Elastomer System was chosen as a cost effective alternative to the vulcanizing of rubber sheets to the clamps. 80 half clamps were completed within 2 days.
