

BELZONA COLD BONDING STOPS PIPE VIBRATIONS

ID: 4486

Industry: Chemical & Petrochemical
Application: VPF-Valves, Pipes and Fittings
Substrate: Carbon steel
Products: * Belzona® 1111 (Super Metal) ,

Customer Location: Petrochemical Plant, Bohai Bay, China
Application Date: 2010

Problem

During loading and unloading, the pipework suffered from vibration. Increased frequency of loading and discharge was exacerbating the problem and structural damage was a concern. Additional supports were designed to solve problem but due to safety restrictions, no hot work was allowed. Cold bonding of additional supports using Belzona was therefore specified.

Photograph Descriptions

- * Surface preparation ,

- * Application completed ,
- * Overview of the tank top pipework ,

Application Situation

Petrochemical storage tank roof.

Application Method

Application was carried out in accordance with Belzona Know-How System Leaflet VPF-15.

Belzona Facts

Belzona provided the client with the solution to eliminate vibrations by installing additional supports on the tank roof. The cold bonding avoided hot work. The modification was achieved in just 4 hours.
