Problem

Shaft became worn due to bearing failure

Photograph Descriptions

- * Shaft prior to the application ,
- * Application in process ,
- * Application with formers ,
- * Formers removed and application completed ,

Application Situation

Damaged shaft at a waste water plant

Application Method

Application was carried out in accordance with Belzona Know-How System Leaflet MPT-2. Damaged area was prepared with a grinder to make the surface rough and ready for the application. The surface of the formers were treated with Belzona 9411, applied in 2 coats in accordance with the Belzona Instructions For Use. Belzona 1111 was applied to the shaft and the formers. Then the formers were attach to the shaft allowing the Belzona 1111 to cure in accordance with the Belzona Instructions For Use. A suitable emery cloth/crocus paper was used to complete the application.

Belzona Facts
