Problem

The original rubber lagging was no longer effective and customer opted for Belzona because it could be done in the maintenance shop over the weekend.

Photograph Descriptions

* The original lagging has been removed and the steel surface ground to provide a rough profile onto which the Belzona product is applied ,

* Completed application. In this instance a chevron type pattern was employed to ensure that rain water (Outside application) would be swept to the outer circumferences of the roll. ,

Application Situation

Rubber lagging on drive pulley

Application Method

Application carried out in accordance with Belzona Know-How System Leaflet SHM-12

Belzona Facts

The Belzona product is applied directly to the steel roll. It also provides a far higher degree of positive traction increasing belt life by reducing slippage.
