Customer Location: Mississauga, ON, Canada

Application Date: August 2013

Problem

The customer wanted a coating that was slip resistant and offered protection from salt contamination.

Photograph Descriptions

- * Prior to application ,
- * Completed application ,
- * Completed application ,

Application Situation

Staircase access to car park.

Application Method

The application was carried out in accordance with Belzona Know-How System Leaflet FPA-3 for protecting floors and drains against chemical attack. The surface was prepared by power washing the surface to remove dirt, debris and salt contamination. A diamond grinder was used to abrade the surface and remove small floor imperfections. Belzona 5231 was applied for the first coat and Belzona 9221 was broadcasted for increased antiskid properties. A second coat of Belzona 5231 was applied within the overcoat window in accordance with Belzona Instructions For Use.
