## **Photograph Descriptions**

- \* Conveyor belt,
- \* Prior to application,
- \* Completed application,

#### **Application Situation**

Conveyor belt at a recycling center.

#### **Application Method**

The application was carried out in accordance with Belzona Know-How System Leaflet SHM-1 for repairing ripped, torn and worn conveyor belts. The surface was prepared by removing any worn fabric or torn rubber and using a rotary wire brush to abrade the surface, producing a wooly surface. Belzona 9111 was used to clean the entire area. Belzona 2911 was applied to the prepared surface area and Belzona 2211 was brush applied to the surface area.

### **Belzona Facts**

Belzona 2211 is a two-component elastomer polymer repair composite for repairing and rebuilding rubber components. This versatile high performance elastomer can be applied without the need for specialist tools and will bond strongly to a wide range of
