- \* Completed application. Eroded areas were rebuilt with Belzona 1311 and coated with Belzona 1391. ,
- \* Condition of fan blades after 12 months in service. ,

## Application Situation

Eroded fan blades

## Application Method

The application was carried out in accordance with Belzona Know-How System Leaflet FBC-1.

## Belzona Facts

Belzona materials allowed the application to be completed with the minimum amount of downtime; only in one shift. Belzona also provided a sacrificial coating that would ensure the blades would not deteriorate to a point where total replacement became necessary. The balance of the unit was maintained by applying an equal amount of Belzona products per blade. An additional benefit from the application was that power required to run the fan was dramatically reduced (Estimated at  $\pm 15\%$ ).
