ID: 5319

Industry: Buildings & Structures Customer Location: Waterloo, ON, Canada

Application: FPA-Floor Problem Areas Application Date: June 2011

Substrate: Concrete

Products: * Belzona 4131 (Magma-Screed),

* Belzona 4911 (Magma TX Conditioner),

Problem

Spalled concrete around hand rail post.

Photograph Descriptions

- * Prior to application,
- * Preparation in process,
- * Application in process,
- * Completed application ,

Application Situation

Stairs to a municipal recreational centre.

Application Method

The application was carried out in accordance with Belzona Know-How System Leaflet FPA-1 for rebuilding worn and damaged floor surfaces. The step around the hand rail was prepared by removing any loose material. Belzona 4911 (Magma TX Conditioner) was applied using a brush and Belzona 4131 was applied directly on to the conditioned surface, initially spreading to a general level using normal ②screeding techniques and then using a metal straight edge.

Belzona Facts

Belzona 4131 is a two-component system for the repair and resurfacing of concrete and stonework. This high performance, non-porous resurfacing material provides excellent protection against the effects of abrasion, impact, vibration and chemical attack.
