Problem

All five roofs of this commercial business park had numerous water leaks and interior water damage.

Photograph Descriptions

- * Overview of the roof ,
- * Areas to be treated ,
- * Belzona 3111 applied to designated areas, including possible penetrations throughout ,
- * Completed applications, including the seams of the entire perimeter ,

Application Situation

Property Management Company/Owner was looking for a cost-effective solution to seal several old, leaking roofs for his property in order to buy time for budgeting for a complete overhaul.

Application Method

The rock ballast was moved to expose all joints, seams, penetrations, parapets and patches. These known problem areas then received the fully reinforced Belzona 3111 system remediation. The application was carried out in accordance with Belzona Know-How System Leaflet RPA-1.

Belzona Facts

Previous patching had proven ineffective and the roofing consultant declared the roof beyond its usable life and called for a complete replacement. Treating just the problem areas alleviated all of the leaks at a substantial savings over tear-off and
