

BELZONA BONDS RISER BEARINGS ON OFFSHORE PLATFORM

ID: 5539

Industry: Oil & Gas
Application: GSS-Gaskets, Seals and Shims
Substrate: Carbon Steel and Super Duplex Stainless Steel
Products: * Belzona 1111 (Super Metal) ,
* Belzona 1321 (Ceramic S-Metal) ,

Customer Location: Rig Fabricator, South Korea
Application Date: 2014

Problem

When stationed, Risers move inside the housings, creating abrasion and exacerbating corrosion. The decision was made to protect these areas with composite bearings. As the Bearings reached 2.5m diameter and 3m length they were split into (up to 16) sections and had to be bonded in place. A total of 84 risers and housings were completed on the hullside and 27 on the topside.

Photograph Descriptions

- * Fitting Bearing to Housing ,
- * Fitting Bearing to Riser ,
- * Injecting Belzona 1321 ,
- * Riser inserted into Housing ,

Application Situation

Risers and Riser housings needed protection on a new build Central Processing Facility.

Application Method

The application was carried out in accordance with Belzona Know-How System Leaflet GSS-9. The Bearings were aligned in place using jigs, straps and injection port bolts. The Bearing had to be jacked to 4mm from the substrate. The seams were then dammed
