

Belzona Propeller Repair - Tugboat

ID: 556

Industry: *Marine*
Application: *SOS-Ships and Offshore Structures*

Customer Location: *Port Authority, Egypt*
Application Date: *June 2005*

Substrate: *Steel*
Products: ** Belzona® 1311 (Ceramic R-Metal) ,*
** Belzona® 1321 (ceramic S-Metal) ,*

Problem

The propellers were severely corroded-eroded. A previous coating had failed; holes and pitting were found in many locations.

Photograph Descriptions

- * General view of the tugboat ,
- * Erosion-corrosion evident ,
- * Surface after blasting ,
- * Application of Belzona to protect the propellers ,

Application Situation

Voith Schneider® Propellers on a large tugboat.

Application Method

Application was carried out in accordance with Belzona Know-How System Leaflets SOS-1 and SOS-2.

Belzona Facts

Welded joints were the most severely damaged areas, but additional welding to repair the problem would cause heat distortion and unacceptable delay in drydock. Belzona was the best solution to repair and protect this equipment.
