

BELZONA RESIN CHOCKS FOR DREDGER BOILER

ID: 5582

Industry: Marine
Application: GSS-Gaskets, Seals and Shims
Substrate: Steel
Products: * Belzona 7111 (Marine Grade) ,

Customer Location: Port Operator, Middlesbrough, UK
Application Date: April 2015

Problem

A new boiler required chocking into place. A secure, vibration free location was essential to its efficient operation.

Photograph Descriptions

- * The boiler set in place ,
- * Pouring Belzona 7111 into the prepared area ,
- * Product curing around bolts ,
- * Completed application with dams removed ,

Application Situation

Boiler inside engine room of dredger.

Application Method

The application was carried out in accordance with Belzona Know-How System Leaflet GSS-12. The boiler was set into place using jacking bolts, and dams were built around each of the individual bolts. Belzona 7111 was then poured into the prepared areas using a small section of steel as a runway due to the difficult access. The thickness of the pour was just over 2 inches, so a solidifier reduction was used.

Belzona Facts

The Belzona 7111 resin chocks were quickly and effectively installed and will ensure a secure, vibration free location for the boiler.
