- * Application in progress,
- * Completed application,

Application Situation

Scum tank at a water pollution control plant.

Application Method

The application was carried out in accordance with Belzona Know-How System Leaflet HEX-9 for repairing leaking pipework. The surface was prepared using a grinder to roughen the surface and Belzona 9111 was used to clean the area. Belzona 1161 was applied around the hole and then a piece of metal was placed over the product. Once the piece of metal is in place, Belzona 1161 was applied around the pipe in accordance with Belzona Instructions For Use.
