- * Completed application,

Application Situation

Process kettle at a food production plant.

Application Method

The application was carried out in accordance with Belzona Know-How System Leaflet VPF-1 for rebuilding erosion-corrosion damage. The surface was prepared by using a hand grinder. Belzona 9111 was used to remove all of the dirt and grease from the surface. A layer of Belzona 1511 was applied to the area and Belzona 9341 was wrapped over the layer. Then, Belzona 1511 was applied once again in accordance with the Belzona Instructions For Use.

Belzona Facts

The customer chose the Belzona solution since Belzona 1511 is a high temperature repair system that is designed for repairing metal and rebuilding equipment, while providing excellent corrosion protection. Under immersion, Belzona 1511 is suitable for
