

BELZONA REPAIRS CRUSHER SHAFT

ID: 5847

Industry: Mining & Quarrying

Customer Location: Cement plant, Northern Cape, South Africa

Application: MPT-Mechanical Power Transmission

Application Date: April 2013

Substrate: Steel

Products: * Belzona 1111 (Super Metal) ,

Problem

The hammer crusher shaft was worn on the taper bearing location.

Photograph Descriptions

* 1. Shaft being prepared. 2. Roughened shaft being degreased with Belzona 9111 3. Belzona 1111 applied to shaft before former located 4. New bearing installed on the shaft ,

Application Situation

Crusher shaft

Application Method

Application was carried out in accordance with Belzona System Leaflet MPT-2. A former was used to accurately rebuild bearing location on the shaft.

Belzona Facts

It was very costly to have a new shaft installed and the loss of production was unacceptable. Huge cost savings made as this was done in situ with Belzona and no production loss.
