

# LIVE LEAKS STOPPED AND SEALED WITH BELZONA

ID: 5982

Industry: *Chemical & Petrochemical*  
Application: *TCC-Tanks and Chemical Containment Areas*  
Substrate: *Carbon Steel*  
Products: *\* Belzona 1212 ,*

Customer Location: *Tank Farm, Genova, Italy*  
Application Date: *December 2015*

## Problem

*The tanks suffered from severe corrosion up to through-wall defects with some live seawater leakage. It was only possible to stop the filtration plant for two hours.*

## Photograph Descriptions

- \* General view of equipment ,
- \* Detailed leakage ,
- \* Plate bonded with Belzona 1212 ,
- \* Close up of one of the bonded plates ,

## Application Situation

Vertical sea water tanks in the activated carbon filtration plant of a coastal Hydrocarbon storage tank farm.

## Application Method

The application was carried out in accordance with Belzona Know-How System Leaflet TCC-1. Surface preparation was carried out using an MBX bristle blaster. Several metal plates were cold bonded with Belzona 1212 to cover thin wall and through wall defects.

Repair • Protect • Improve

## Belzona Facts

For a traditional weld repair, the customer would have to shut down the system and completely empty the tanks. Due to its surface-tolerant and fast-curing properties, Belzona 1212 was applied directly onto leaking tanks, bypassing the need for a shutdown. In a couple of hours the customer forgot about his problem.
