# BELZONA STOPS LEAKS AND PROTECTS PARKED CARS

ID: 6043

Industry: Buildings & Structures Customer Location: Houston, TX, USA
Application: VPF-Valves, Pipes and Fittings Application Date: December 2015

Substrate: Carbon Steel

Products: \* Belzona 1161 (Super UW-Metal),

\* Belzona 5111 (Ceramic Cladding),

#### **Problem**

Cooling tower line drains were leaking and causing damage to the paint of vehicles parked below. Aesthetics were important to the client. Not only did they need the leak stopped, they also needed a solution that would not be an eye-sore to their tenants.

### **Photograph Descriptions**

- \* Before Application,
- \* After surface preparation ,
- \* Belzona 1161 used to apply cap to leaking area,
- \* Complete project with Belzona 5111 used to match the existing paint on the line,

## **Application Situation**

Cooling tower drain lines.

### **Application Method**

The application was carried out with a modified version of Belzona Know-How System Leaflet VPF-15.
