Problem

The pipe was corroded so badly that the pitting was causing pin holes in the substrate.

Photograph Descriptions

- * Corroded pipe before application. ,
- * Internals of pipe after SP-10 Abrasive Blast. ,
- * Applicators applying Belzona 1121 to pitting. ,
- * The pipe after being coated with Belzona 5811. ,

Application Situation

42" Ductile Iron underground pipe.

Application Method

The application was carried out in accordance with a modified version of Belzona Know-How System Leaflet VPF-5. Belzona 1121 was used to rebuild the pitting. Belzona 5811 was used to coat the internal of the pipe.

Belzona Facts

The cost of the project was \$70,000 USD and required a week of downtime for the plant to rebuild the pipe and coat. The Belzona was a much better alternative to the to the cost of over a million dollars to dig the pipe up and replace it with two months of downtime.
